

Summary

Skilled Software Developer with expertise in React.js, Next.js, and Angular, focused on building scalable, high-performance web applications. Proficient in UI/UX design, state management with Redux, and RESTful API integration. Experienced in performance optimization, application migration, and delivering user-centric solutions in agile environments

Experience

IndiaHikes
Frontend Developer
Sep 2024 - Present

India

- Developed and enhanced web applications using Next.js, focusing on delivering high-performance and SEO-optimized features.
- Implemented key optimizations, reducing page load time by 30% and improving user engagement metrics.
- Designed and deployed new features, improving customer interaction and boosting platform functionality.
- Collaborated with cross-functional teams to ensure scalability and maintainability of the codebase.

LogiNext Solutions
Frontend Developer
Feb 2024 - Jul 2024

- Led the migration of legacy Angular applications to React.js, enhancing maintainability and scalability.
- Optimized application performance by implementing code splitting, lazy loading, and caching techniques, resulting in faster load times.
- Improved frontend architecture and implemented Redux for efficient state management, streamlining data flow, and enhancing app performance.
- Collaborated in an agile environment, ensuring timely delivery of features and maintaining high code quality through Git and code reviews.

Illusion Dental Laboratory

Full-stack Developer

Jan 2023 - Feb 2024

- Designed and developed a comprehensive Admin Dashboard to streamline internal operations and improve data accessibility for stakeholders.
- Reduced AWS costs by optimizing server usage, implementing efficient caching strategies, and configuring auto-scaling.
- Built and deployed a Customer Portal, enhancing user experience and enabling seamless interaction with the company's services.
- Conducted performance optimization across the platform, ensuring faster load times and improved system reliability.

Projects

[TeamSync Pro](#)

- Designed and developed a team management application using the MERN stack, enabling organizations to efficiently manage attendance, time off requests, and employee feeds.
- Implemented a Request Demo feature with dummy data, allowing users to explore the platform without registration.
- Optimized the application's UI/UX for responsiveness and performance.

[Cryptocurrency Wallet Analysis & ML Ranking System](#)

- Developed a data-driven cryptocurrency wallet analysis system that collects transaction histories and portfolio data from the Solana blockchain using APIs.
- Engineered financial features like ROI, trading frequency, volatility, Sharpe ratio, and loss ratio to rank wallets based on performance.
- Built a machine learning model to analyze and predict high-performing wallets.
- Automated data fetching, feature engineering, preprocessing, and model training using Python and Pandas, ensuring scalable insights for investment tracking.

Certifications

- Hands-on Introduction to Linux Commands and Shell Scripting
- Continuous Integration and Continuous Delivery (CI/CD)
- Developing AI Applications with Python and Flask
